## HOBBIES

Vector Illustrations

Reading

Teaching

FPS Games

Software developer with 5+ years of proficiency in designing microservice-oriented architecture for various applications. Adept at building scalable and responsive web applications. Expert knowledge of JavaScript both in the browser and on server-side. Deep knowledge of Agile methodologies and industry IT standards.

## EDUCATION

**Birla Vishwakarma Mahavidhyalaya** (April 2014 - May 2017)  
Bachelor's Degree Computer Science & Engineering 7.8/10

**Parul Polytechnic Institute** (April 2011 - March 2014)  
Diploma Computer Science & Engineering 9.5/10

## SKILLS

HTML5/CSS3

Javascript

React

Vue

Firebase

NodeJS

## WORK EXPERIENCE

**Deqode** (July 2021 - Jan 2022)  
Senior Solution Engineer

- Created cross-browser compatible and standards-compliant using ReactJS and AngularJS
- Developed modules in large cross-platform applications using Web Services (REST), Microservices
- Developed scalable applications using the MERN stack
- Peer review code for adherence to coding standards and design guidelines
- Experienced in front end technologies, HTML, CSS & ReactJS
- Designed, built, and deployed applications utilizing the AWS stack
- Used Git for continuous integration and delivery

**Rishabh Software** (December 2017 - June 2021)  
Software Developer

- Created simple API-centric web application
- Experience in building NodeJS applications with Javascript, Typescript
- Collaborated with UX and visual designers to implement proposed designs
- Evaluated and utilized the latest concepts, tools, and technologies
- Leverage AWS cloud based technologies for centralized and remote data access
- Developed and Deployed RESTful Web Services
- Worked in all aspects of agile software development including design, implementation, and deployment
- Projects built using: Material UI, Angular ag-grid, Websocket, MomentJS, PrimeNg, Ionic-Angular, Nodemailer, Firestore DB & SonarQube.

## PROJECTS

**100 Days of React**  
<https://reactjs101.vercel.app/>

**100 Days of CSS**  
<https://css101.vercel.app/>

**Todo Application**  
<https://vanillav2beta.netlify.com/>

*Takeaways: DOM manipulation & CSS Built with: VanillaJS, Git, Netlify, Localstorage, JQuery*

**Data Visualization in Virtual Reality**  
<https://github.com/BVMFinalYearProjectGroup/DataVisualizationInVR>  
*Final Year Project. Built with: DeckGL, React, Python, Blender*
